Languages: C, Java, JavaScript, SQL
Web: HTML, CSS, React (Basic)
Databases: MySQL, MongoDB, Oracle Database
Other: OOP, SDLC, Manual & Automation Testing, Selenium, MS Excel, Problem Solving, Teamwork

PROJECTS

- **AI-Powered Automatic Timetable Generator:** Designed to generate conflict-aware academic timetables using subjects, teachers, classrooms, time slots, and institutional constraints.
- **Online Exam Seat Management System:** Manages student, subject, and faculty details, classroom supervision assignments, student exam lookup by PRN, and faculty email notifications.
- **Jewellery Shop Management Software:** Supports inventory, customer purchases, supplier details, and sales reporting.
- **Sound Detection IoT Project:** Uses a sound sensor and micro-controller to detect sound levels and trigger actions at defined thresholds.
